Attorneys for Plaintiffs

Pursuant to the Court's June 30 Docket Entry (ECF 103), Plaintiffs address *Allco Finance Limited v. Klee*, No. 16-2946, ___ F.3d ___, 2017 WL 2782856 (2d Cir. June 28, 2017).

I. Standing

Allco held that the plaintiff in that case had standing to pursue preemption and Commerce Clause claims. *Allco* slip op. ("Op.") at 23-25, 41. Just as Defendants do here, the *Allco* defendants argued that plaintiff lacked standing to bring an FPA preemption claim in light of *Armstrong v. Exceptional Child Ctr., Inc.*, 135 S.Ct. 1378 (2015). See Brief of K.S. Dykes, *et al.* (No. 16-2946, ECF 128) at 28-30. The Second Circuit upheld standing without mentioning this argument, thus effectively rejecting it. Exelon also contends that Plaintiffs lack standing because the value of a ZEC decreases as wholesale electricity prices rise. But as *Allco* recognized, "the fact that an injury may be outweighed by other benefits, while often sufficient to defeat a claim for damages, does not negate standing." Op. at 25 n.10 (quotation omitted). Accordingly, *Allco* supports Plaintiffs' standing in the instant case.

II. Preemption

Allco's preemption analysis is entirely consistent with Plaintiffs' position in this case. Indeed, *Allco* found that Connecticut's renewable generation contracts "are the kind of traditional bilateral contracts between utilities and generators that are subject to FERC review for justness and reasonableness. . . . They are, in other words, precisely what the *Hughes* court placed outside its limited holding." Op. at 34 (citations omitted). In applying the factors set out in *Hughes*, *Allco* focused on three points, all of which support Plaintiffs here.

First, although the plaintiff in *Allco* contended the Connecticut program compelled LSEs to contract with the renewable generators who were the "winning bidders," the Second Circuit found that the challenged RFP did **not** require forced purchases, and gave LSEs discretion to

accept or reject bids. Op. at 28-30. Here, the opposite is true – Illinois LSEs have no right to decline to enter into ZEC purchase contracts. See 20 ILCS 3855/1-75(d-5)(1).

Second, in the Connecticut program, any voluntary bilateral contracts between LSEs and renewable generators to purchase RECs take effect only if and when they are approved as “just and reasonable” by FERC (Op. at 34). FERC’s review considers, *inter alia*, whether the contract was the product of good-faith, arms-length negotiation. See *Morgan Stanley Capital Group Inc. v. Public Utility Dist. No. 1*, 554 U.S. 527, 548 (2008). In stark contrast to Connecticut, Illinois LSEs are compelled to enter into ZEC purchase contracts that are **not** conditioned on FERC review or approval, and the contract price is set by state regulation, not arms-length negotiation.

Third, the *Allco* Court found that the voluntary, bilateral REC contracts there did not have the “fatal defect” that afflicted the Maryland contracts in *Hughes*, because in Connecticut, “transfers [of] ownership of electricity from one party to another by contract [are] independent of the [FERC-regulated wholesale energy] auction.” Op. at 34. Here, Plaintiffs allege that Exelon’s nuclear plants will receive ZECs only to the extent they produce electricity and that all electricity they produce must be sold in the FERC-regulated PJM or MISO wholesale auction markets. Moreover, the ZEC price is directly tethered to those market prices and is necessarily payable only for electricity that clears the auctions. Complaint ¶¶ 5, 36, 53, 63-64.¹

Finally, *Allco* involved RECs, which are different from ZECs for the many reasons set forth in previous filings in this action. See *id.* ¶ 51-53; ECF 83 (Plaintiffs Opp. Br.) at 21-24;

¹ The *Allco* plaintiff also argued that, even though the Connecticut program was unrelated to the FERC-approved auctions, any resulting contracts would place “downward pressure” on wholesale prices. Op. at 38. The Second Circuit held that such effects were too “indirect” and “incidental” to support preemption. For the reasons stated in the text, this reasoning does not apply here, where the ZECs, unlike Connecticut’s RECs, are “tethered to a generator’s wholesale market participation” and conditioned “on capacity clearing the auction.” Op. at 38-39 (quoting *Hughes*, 136 S.Ct. at 1299).

ECF 68-1 (Am. Wind Energy Ass’n Amicus Br.) at 6-10. For all of the foregoing reasons, *Allco* provides no support for dismissal of Plaintiffs’ preemption claims.

III. Commerce Clause

The facts on which the Second Circuit relied in dismissing *Allco*’s Commerce Clause claims are absent here. *First*, Connecticut’s program did not require utilities to purchase RECs at all; it simply *permitted* LSEs to use RECs to meet their renewable energy portfolio (“RPS”) requirements, which they otherwise had to satisfy by generating renewable energy themselves. *Op.* at 18. The Illinois ZEC program affords no such flexibility in responding to market conditions, because it requires LSEs to purchase ZECs from specified in-state nuclear plants. *See* Complaint ¶ 59; 20 ILCS 3855/1-75(d-5)(1).

Second, the *Allco* court considered at length the geographic discrimination inherent in the Connecticut program, which was limited to RECs sold by generators located in seven states that delivered electricity into the grid serving Connecticut. *Op.* at 19-20. The court found no discrimination against generators located elsewhere because the burden on commerce was not “excessive in relation to the putative [local] benefits” including encouraging development of renewable facilities that could actually transmit electricity into the Connecticut grid. *Op.* at 20, 41-53. A “significant” consideration was that FERC “created the geographic distinctions on which Connecticut’s program” “piggybacks;” the state did not draw boundaries to facilitate economic protectionism. *Op.* at 51-52. This case is different. Illinois did not “piggyback” on the “economic wisdom” of FERC-drawn lines, *id.*, but rather intended to favor only selected in-state nuclear plants even though its grid is served by similarly-situated out-of-state facilities. Complaint ¶¶ 58-62, 65. While some ninety percent of the Connecticut RECs came from out of state (*Op.* at 43 n.16), there will be zero ZEC payments made to facilities outside of Illinois.

Dated: July 10, 2017

Respectfully submitted,

By: /s/ Stuart H. Singer
